### **Summary:**

Curious, dedicated, and always eager to learn. I'm a second-year B.Tech Computer Engineering student with a growing passion for building technologies that are not just functional, but human-centric. I'm particularly skilled in Python, MySQL, C++, Java, and full-stack fundamentals, and I enjoy translating complex logic into clean, interactive user experiences. Beyond code, I value teamwork, empathy, adaptability, and clear communication, qualities that have helped me collaborate on diverse group projects and lead initiatives in college clubs. Now, I'm seeking an internship opportunity where I can grow further, contribute positively to a real-world team, and gain exposure to the inner workings of a company that values innovation, curiosity, and community.
